Food Delivery Management System

Project Information:

Course: CS 2210  
Stage: 3 (Command Line Application)  
Team Members: Evan Darmanto, Lauren White

How to compile:

1. Make sure all of the .java file are in the same directory  
2. Open terminal/command prompt in that directory  
3. Run javac \*.java

How to run:

After successful compilation, run java Main

System Features:

1. Customer Management:  
- Add, view, update, and delete customers  
- Manage customer allergies

2. Delivery Driver Management:  
- Add and view drivers  
- Manage driver ratings

3. Restaurant Management:  
- View restaurant and menus  
- Filter menu items by category

4. Order Management:  
- Create and track orders  
- Update order status

5. Support Staff Management  
- View and add support staff  
- Assign and resolve customer issues

6. Payment Management:  
- Create and process payments  
- Generate receipts

7. System Reports  
- View comprehensive statistics for all entities
